PROFILE

Software engineer building backend applications and operating cloud infrastructure since 2021. Experience includes AWS infrastructure automation, MongoDB replica-set scaling, government APIs, and admissions platforms. Hands-on work spans implementation, deployment, production support, and team delivery.

PROFESSIONAL EXPERIENCE

BHE Uni

2025 - Present

Full Stack / Infrastructure Engineer

Admissions technology, full-stack development, production delivery, and team supervision

- Build admissions CRM workflows for leads, agents, courses, applications, and documents using FastAPI, Laravel, Next.js, and React; implement appointments, status histories, and notes.
- Integrate Meta Graph API lead collection with scoring, counselor assignment, notifications, and enrollment tracking across the admissions lifecycle.
- Optimize Laravel queues, scheduled jobs, Redis caching, and SQL; manage deployments and production support with GitHub Actions, Docker, Nginx, and SSL/TLS.
- Lead development of bheuni.uk and ambassador.bheuni.uk; supervise the launch of bangladesh247.com.
- Supervise development progress, coordinate Scrum updates, and support onboarding and release activities.

D2Soft Intelligence

2022 - 2025

Program Manager

Engineering scope: AWS infrastructure, backend services, database scaling, and Linux production operations

- Automated AWS infrastructure provisioning and configuration with Terraform and Terragrunt; operated EC2, VPC, WorkSpaces, and Secrets Manager.
- Deployed and scaled MongoDB replica sets on EC2; monitored applications and infrastructure with Datadog and Amazon CloudWatch.
- Developed backend services in Python/FastAPI, C#/ASP.NET Core, and PHP/Laravel; wrote Python automation for container registry, container management, and caching tasks.
- Administered Linux users, permissions, and firewalls; configured Nginx, Apache, Supervisor, and strongSwan IPsec VPN connections; maintained JFrog artifact workflows.
- Contributed to bakome.com and government and aerospace projects using C++, Python, and AWS.

PROFESSIONAL EXPERIENCE - CONTINUED

Bangla Puzzle Limited
2021 - 2022

Web Developer

Government APIs, commercial applications, and interactive real estate platforms

- Developed the e-commerce API backend for sadai.gov.bd and field monitoring APIs for government health and family planning operations.
- Developed mojargames.com APIs, contributed Vue.js features, and integrated APIs with a Unity application.
- Managed real estate websites using Unreal Engine Pixel Streaming for real-time building and interior rendering for broker and property developer workflows.
- Delivered Laravel applications with bKash and SSLCommerz payment integrations; managed Linux hosting and deployments.

ADDITIONAL ENGINEERING EXPERIENCE

- Implemented Amazon EKS autoscaling using Helm and HCL-based infrastructure configuration.
- Managed Okta applications, users, and groups.

TECHNICAL SKILLS

Languages & backend: Python, C#, PHP, C++, JavaScript; FastAPI, ASP.NET Core, Laravel, Node.js; REST APIs, authentication, queues, scheduled jobs.

Cloud & delivery: AWS EC2, EKS, VPC, IAM, S3, RDS, Route 53, WorkSpaces, Secrets Manager; Terraform, Terragrunt, Docker, Kubernetes, Helm, GitHub Actions, JFrog.

Databases & operations: MongoDB replica sets, PostgreSQL, MySQL, SQL Server, Redis; Linux, Nginx, Apache, Supervisor, cron, SSL/TLS, strongSwan; Datadog, CloudWatch, Okta.

Frontend & data: React, Next.js, Vue.js; Databricks, data warehousing; Git, Postman, Jira.

EDUCATION

M.Sc. in Computer Science 2024 - Present

Jahangirnagar University

Research: AI Applications in Medical Science

B.Sc. in Computer Science & Engineering 2017 - 2020

Daffodil International University

TRAINING & LANGUAGES

Genuity Training: Network & System Administration; Web Design & Development.

Languages: Bengali (Native), English (Professional).
