

Md. Tanvir Hasan Anik

Cloud & Backend Software Engineer

tanviranikcs@gmail.com +880 1887 454489 tanviranik.com
github.com/ProAnik linkedin.com/in/md-tanvir-hasan-anik-8711551ba

Software engineer working across **AWS infrastructure, backend development, and Linux operations** since 2021. Experience includes infrastructure as code, APIs, Python automation, **MongoDB replica sets and scaling, Databricks, big data management, and data warehousing**, plus **Okta application, user, and group management at scale**. Managed interactive real estate websites using **Unreal Engine Pixel Streaming** for real-time building and interior rendering, with a strong understanding of broker and property developer workflows.

Cloud infrastructure	Backend programming	Linux & server operations
AWS / Terraform / Terragrunt Datadog / Databricks	Python / .NET / Laravel / JavaScript APIs / Automation	Administration / Networking Web servers / VPNs

PROFESSIONAL EXPERIENCE

BHE Uni

2025 - Present

Fullstack/Infrastructure Engineer / Team supervision & delivery

- **Supervise development and delivery**, monitor progress, coordinate Scrum updates, and support onboarding; supervised the launch of **bangladesh247.com**.
- Lead development of **bheuni.uk** and **ambassador.bheuni.uk**; improve **bheuni.io** SEO to strengthen search visibility and competitiveness.
- Build a **university admissions CRM** for leads, agents, people, courses, applications, and documents, with appointment scheduling, status and timeline tracking, and notes, using **FastAPI, Laravel, Next.js, and React**.
- Integrate the **Meta Graph API** for lead collection, scoring, counselor assignment, notifications, and enrollment tracking.
- Manage deployment and production support with **GitHub Actions, Docker, Nginx, and SSL/TLS**; optimize Laravel queues, schedulers, Redis caching, and SQL.

D2Soft Intelligence

2022 - 2025

Program Manager / Cloud infrastructure & software engineering

- Operated **AWS EC2, VPC, WorkSpaces, and Secrets Manager**; automated infrastructure with **Terraform and Terragrunt** and maintained **JFrog** artifact and container workflows.
- Deployed and **scaled MongoDB replica sets on EC2**; monitored applications and infrastructure with **Datadog and Amazon CloudWatch**.
- Developed **Python/FastAPI, C#/.NET, and PHP/Laravel** services and Python automation for container registries, container management, and caching.
- Contributed to **bakome.com** and government and aerospace projects using **C++, Python, and AWS**.
- Administered **Linux servers, users, permissions, and firewalls**; configured Apache, Nginx, Supervisor, and **strongSwan VPN** connections.

PROFESSIONAL EXPERIENCE / CONTINUED

Bangla Puzzle Limited

2021 - 2022

Web Developer / Government & commercial applications

- Developed the **e-commerce API backend** for the government platform **sadai.gov.bd**.
- Built **field monitoring APIs** for government health and family planning operations.
- Developed **mojargames.com APIs**, worked on **Vue.js** features, and integrated APIs with a **Unity application**.
- Managed interactive real estate websites with **Unreal Engine Pixel Streaming** for building and interior visualization, supporting broker and property developer workflows.
- Delivered Laravel apps with **bKash/SSLCommerz** payments; managed Linux hosting and deployments.

TECHNICAL SKILLS

01 Cloud & infrastructure	AWS: EC2, VPC, WorkSpaces, Secrets Manager, IAM, S3, RDS, Route 53, CloudWatch. Infrastructure as code: Terraform, Terragrunt. Delivery: Docker, Kubernetes, JFrog, GitHub Actions, CI/CD. Monitoring: Datadog, CloudWatch, application and infrastructure monitoring.
02 Programming & backend systems	Core: Python, FastAPI, C#, ASP.NET Core, PHP, Laravel, C++. Backend: REST APIs, authentication, queues, scheduled jobs, caching, container registry automation. Data platforms: MongoDB replica sets, Databricks, big data management, data warehousing, Redis, MySQL, PostgreSQL, Microsoft SQL Server. Supporting stack: JavaScript, Node.js, React, Next.js.
03 Operating systems & server administration	Administration: Linux, server configuration, user and permission management, deployment troubleshooting. Networking & access: VPC networking, firewalls, SSL/TLS, strongSwan IPsec VPN. Services: Apache, Nginx, reverse proxies, Supervisor, background workers, cron scheduling.

EDUCATION

M.Sc. in Computer Science Jahangirnagar University Research: AI Applications in Medical Science	2024 - Present
B.Sc. in Computer Science & Engineering Daffodil International University	2017 - 2020

TRAINING & WORKING PRACTICES

Training: Network & System Administration; Web Design & Development - Genuity Training.

Everyday tools: Git, GitHub, GitLab, Postman, Jira. **Workflow:** Agile / Scrum.

Languages: Bengali (Native), English (Professional).
