Summary

Software engineer with **5+ years** delivering full-stack applications and operating production cloud infrastructure. Built complete CRMs with **Laravel and React** and backend services for national government platforms. Experience spans **multi-account AWS**, **Okta** group, role and permission management, **Terraform/Terragrunt**, self-hosted **MongoDB** replica sets and **Databricks**. Own delivery from architecture and implementation through CI/CD, production operations and engineering team leadership.

ENGINEERING HIGHLIGHTS

Cloud Infrastructure
Multi-account AWS, Okta access management and Terraform infrastructure.

Full-Stack Delivery
Complete Laravel + React CRMs and APIs for national government platforms.

Engineering Ownership
Architecture, CI/CD and production operations, alongside team leadership.

Experience

Full Stack Developer — CRM Platforms & Cloud Delivery

2025 – Present

BHE Uni · University admissions CRM, lead lifecycle and enrollment infrastructure

- Built the complete CRM for Tarek Associates, owning the Laravel backend and React frontend from implementation through delivery.
- Built the release pipeline end to end with GitHub Actions, Docker images, Nginx reverse proxying and automated SSL/TLS renewal, so deployments to Linux production carry no downtime and roll back with one step.
- Scaled lead ingestion for peak admissions periods using Laravel Horizon queue workers, scheduled daemons, Redis caching and query indexing.
- Engineered idempotent Meta Graph API webhook listeners for real-time lead capture, plus applicant-scoring rules and CRM modules (FastAPI, Laravel, Next.js, React) with role-based access control and audit trails.
- Designed a secure document pipeline for transcripts and identity records on encrypted S3 with short-lived presigned URLs.
- Shipped bheuni.uk, ambassador.bheuni.uk, bheuni.io and bangladesh247.com; run Agile sprints and review code for the engineering team.

Program Manager / Senior Software Engineer

2022 – 2025

D2Soft Intelligence · Cloud infrastructure, distributed backends, enterprise & aerospace software

- Defined multi-tier AWS environments entirely in Terraform and Terragrunt (VPC, EC2, IAM, networking) and used JFrog Artifactory to manage container images and build artifacts.
- Designed VPC topologies with public/private subnets, NAT gateways, Route 53 and cross-VPC peering; moved credentials into Secrets Manager and provisioned isolated AWS WorkSpaces for developers.
- Ran self-hosted MongoDB replica sets on EC2 across multiple Availability Zones with automatic primary failover, scheduled EBS snapshots and private-subnet isolation.
- Set up Datadog APM and CloudWatch alarms to find and resolve incidents faster; hardened the Linux fleet with PAM, iptables/UFW, Nginx/Apache and strongSwan site-to-site IPsec tunnels.
- Built Laravel backend services and Next.js frontend applications for bakome.com, a US food-delivery marketplace; worked on cluster infrastructure and automated deployments with GitLab CI/CD.
- Delivered C++ compute modules for government aerospace contracts; led engineering teams, architecture reviews, sprint planning, client milestones and technical hiring.

Experience (continued)

Web Developer — Government & Public Sector Systems 2021 – 2022

Bangla Puzzle Limited · National e-commerce, public health reporting and enterprise web platforms

- Built the core e-commerce REST API for sadai.gov.bd (Department of Agricultural Marketing, Ministry of Agriculture), connecting farmers, wholesalers and consumers across the web and two Android apps (Sadai, Sadai Uddokta).
- Developed the backend for the Directorate General of Family Planning's field-monitoring platform (Ministry of Health & Family Welfare), used by field officers in all eight divisions of Bangladesh.
- Integrated bKash and SSLCommerz payments with signed webhook verification, ledger reconciliation and automated receipts across Laravel, Vue.js and React apps.
- Administered Linux production hosting: Nginx/Apache reverse proxies, cron scheduling, SSL certificates and zero-downtime releases.

Selected Projects

sadai.gov.bd — National Agri E-Commerce

Government platform · Ministry of Agriculture

Multi-client REST API behind farmer-to-consumer ordering, product catalogs and bKash/SSLCommerz payments, serving one web and two Android clients.

Laravel · MySQL · Redis · Nginx · Linux

DGFP Field Monitoring Platform

National health · Ministry of Health & Family Welfare

Sync and aggregation backend that collects maternal and field-health inspection reports from officers across all 8 divisions of Bangladesh.

Laravel · PostgreSQL · REST · Cron

bakome.com — Multi-App Delivery Platform

US marketplace · Maryland, Washington DC, Virginia

Laravel backend and Next.js frontend for a regional food-delivery marketplace, with cluster infrastructure and deployment automation through GitLab CI/CD.

Laravel · Next.js · GitLab CI/CD · AWS

Multi-VPC AWS & MongoDB Platform

Cloud infrastructure · Infrastructure as Code

Terraform/Terragrunt modules that provision multiple VPC environments, with multi-AZ MongoDB replica sets on EC2 monitored by Datadog and CloudWatch.

Terraform · Terragrunt · MongoDB · Datadog

Skills

Cloud & IaC	AWS (EC2, VPC, IAM, Route 53, RDS, S3, Secrets Manager, WorkSpaces, CloudWatch), Terraform, Terragrunt, Docker, Kubernetes, GitHub Actions, GitLab CI/CD, JFrog Artifactory, Azure
Linux & Networking	Ubuntu, Debian, RHEL administration; PAM; iptables / UFW; strongSwan IPsec VPN; Nginx; Apache; Supervisor; SSL/TLS; VPC design
Identity & Access	Multi-account AWS administration; Okta groups, roles and permissions; AWS IAM; role-based access control
Languages & APIs	Python (FastAPI), C# (ASP.NET Core), PHP (Laravel), C++, TypeScript / Node.js; REST, gRPC, WebSockets; React, Next.js, Vue.js
Data & Observability	MongoDB (replica sets), PostgreSQL, MySQL, MSSQL, Redis; Datadog APM & tracing, CloudWatch; Databricks

Education

M.Sc. in Computer Science 2024 – Present

Jahangirnagar University · Research: AI applications in medical science

B.Sc. in Computer Science & Engineering 2017 – 2020

Daffodil International University · Distributed systems, networks, operating systems

Training & Additional

Network & Linux System Administration
Genuity Training · IPsec VPNs, firewalls, routing, access control

Ways of Working
Agile / Scrum, Jira, Git, Postman, code review, technical hiring

Languages
Bengali (native), English (professional working proficiency)
